AUTODROME

il garage dei tuoi sogni

GARAGE DESIGN STUDIO

The garage for your motorcycles

Exclusive garage design for motorcycle enthusiasts and collectors.

WHO WE ARE

The studio

AUTODROME is a studio specializing in the design of bespoke garages for motorcycle enthusiasts and collectors.

The garage stops being a simple shelter and becomes a place to live in: it showcases your motorcycles, tells your story and matches the style of your home.

From the layout of the space to the materials, from lighting to furnishings, every element is designed to be unique, practical and recognizable.

> We don't just design garages.
> We give shape to a passion for two wheels.

THE FOUNDER

Your passion, our vision

I'm Christian Giani, a designer with a technical and architectural background, specializing in collector garages and specialist workshops: the garage of people who see motorcycles as part of who they are.

I have designed bespoke garages and lounges for enthusiasts: from Garage Heritage, 70 m² devoted to motorcycles, to spaces designed around Ducati, MV Agusta and Harley-Davidson.

Every project starts from your space and your motorcycles and goes all the way to completion.

Christian Giani

FOUNDER OF AUTODROME

> Every garage begins with your passion.

EMOTIONS

Create EMOTIONS

You've built your collection.

Now create the space it deserves.

You've spent years searching for the motorcycles you wanted. But does the space where you keep them truly reflect your passion?

AUTODROME designs garages for people who see a motorcycle not just as a means of transport, but as part of their own story.

Passion becomes architecture

Every motorcycle tells a story. We design spaces to enjoy it even with the engine off.

- **A corner to relax**
  Comfortable seating to spend time with friends next to your motorcycles.
- **Racing in the garage**
  Projector and screen for MotoGP, Superbike and films.
- **A tailored atmosphere**
  Adjustable lighting and temperature for every occasion.

MATERIALS & FINISHES

Every detail matters

Floors

Resin or concrete effect, resistant to oil and stands, easy to clean.

Walls

Wood, metal or exposed brick that reflect the light and make the motorcycles stand out.

Furnishings

Workbenches, helmet display cases, leather and wood pleasant to the touch.

Made to measure

Every element reflects the owner's taste.

> You can buy resin, lights and furniture. What makes the difference is the design that makes them work together.

OUR SERVICES

Three ways to reach the garage of your dreams

Choose the path that suits you best.

1

Complete project

We design it and we build it.

From the first meeting to the finished garage: we design the space and coordinate the works, step by step.

FIND OUT HOW ON PAGE 8

2

Guided DIY

We design it, you build it.

We help you decide layout, materials, lighting and furnishings before you spend. You manage the works, on your own schedule and with your own craftsmen.

SERVICE 1

Complete project

Our method in three stages

1 **First meeting**

We listen to your needs and look at the space together. The result is a first idea of the project.

2 **Preliminary design**

Layout, materials, 3D images and a cost estimate: you assess the investment before deciding.

3 **Execution**

We develop the final design and coordinate the works through to the finished garage.

Each stage has its own agreement: after each one, you decide whether to continue.

SERVICE 2

Guided DIY

Your garage, built with your own hands.

We help you decide how to organize the garage, which materials, lights and furnishings to choose and in what order to proceed. You manage the works, on your own schedule and with the craftsmen you choose.

	Basic 500 €	Style 999 €	Complete 1,490 €
WHO IT'S FOR	You want to enhance a wall or a corner of the garage.	You want a coordinated style for a garage up to 30 m².	You want a detailed project for a garage up to 50 m².

TIMING	About 5 working days	About 10 working days	15–20 working days

Timing starts once we receive complete photos, measurements and information. Prices cover consultancy and design; items, furnishings, materials, transport and installation are excluded.

SERVICE 3 · NEW

Furnishing & style

"You already have your garage.
Now make it speak about you."

We start from your motorcycle or your collection. Every piece has a role: the light that enhances the fairing, the platform that showcases the bike, the photo or memorabilia that tells its story.

FIRST OPTION

I'm looking for a special piece

We help you find the right item for your space: an illuminated platform, a sign, a counter, a print or a collector's piece.

SECOND OPTION

I want to renew my garage

We gather photos, measurements, tastes and budget. We propose a style, choose furnishings, lighting and objects and decide where to place them. You can do it all at once or a little at a time.

FURNISHING & STYLE

What we can choose for you

01

Artwork & photography

Photographs, prints, technical drawings and commissioned works.

02

Lighting & signs

Neon, illuminated signs, spotlights and handcrafted lamps.

03

Furniture & lounge

Armchairs, sofas, workshop counters and bespoke pieces.

04

Platforms & display

Illuminated platforms, stands and display cases for motorcycles, helmets and collections.

05

Memorabilia & heritage pieces

Vintage helmets and leathers, racing replicas and collector's pieces.

06

Bespoke details

Plates, silhouettes, signs and accessories made to measure.

PROJECT · 70 M² FOR MOTORCYCLES

Garage Heritage

The space

70 m² of raw brick and a pillar right in the middle.

The idea

The pillar becomes the centre: motorcycles always in view, a fitted workbench along the wall and a lounge corner to stop after a ride.

Light & materials

Exposed brick and a light for every zone: precise on the bench, warm by the sofa, with light lines that follow the beams.

From raw building site to finished garage.

Outline design developed in the Pit Stop Vision preliminary phase.

Garage Officina

Ducati Panigale V4

AUTODROME CONCEPT DESIGN

THE PROJECT

A compact garage where the Panigale is the one and only star.

THE CHOICES

Dark timber-beamed ceiling; amber LED strips on ceiling and tool chests; technical mat under the bike; fitted walls for helmets and spares.

THE RESULT

Just a few square metres, with the feel of a racing pit.

AUTODROME

il garage dei tuoi sogni

Garage Harley

Harley-Davidson

AUTODROME CONCEPT DESIGN

THE PROJECT

A garage devoted to American custom culture.

THE CHOICES

Suspended ceiling with orange light frames; backlit sign; workbench with tool chests; posters and road-trip memorabilia on the walls.

THE RESULT

A retreat where the motorcycles and their story live side by side.

Garage Vetrina

MV Agusta

AUTODROME CONCEPT DESIGN

THE PROJECT

A display space for the motorcycle and the collection.

THE CHOICES

Red backlit display cases for scale models and helmets; illuminated ceiling beams; sculptural wall panels; dark wood floor.

THE RESULT

The motorcycle as if in a museum, but at home.

Garage Dolce Vita

Vespa

AUTODROME CONCEPT DESIGN

THE PROJECT

A living space where the Vespa becomes the centrepiece.

THE CHOICES

Wood parquet; shelves of vinyl records and books; cyan and red lights along the shelves; brick wall with a screen for Italian film classics.

THE RESULT

A corner of dolce vita to enjoy every day.

Garage Living

Ducati Panigale V4

AUTODROME CONCEPT DESIGN

THE PROJECT

A living-garage dedicated to the Panigale V4.

THE CHOICES

Metal shelving for trophies and scale models; leather sofa; wall projection; illuminated bookcase.

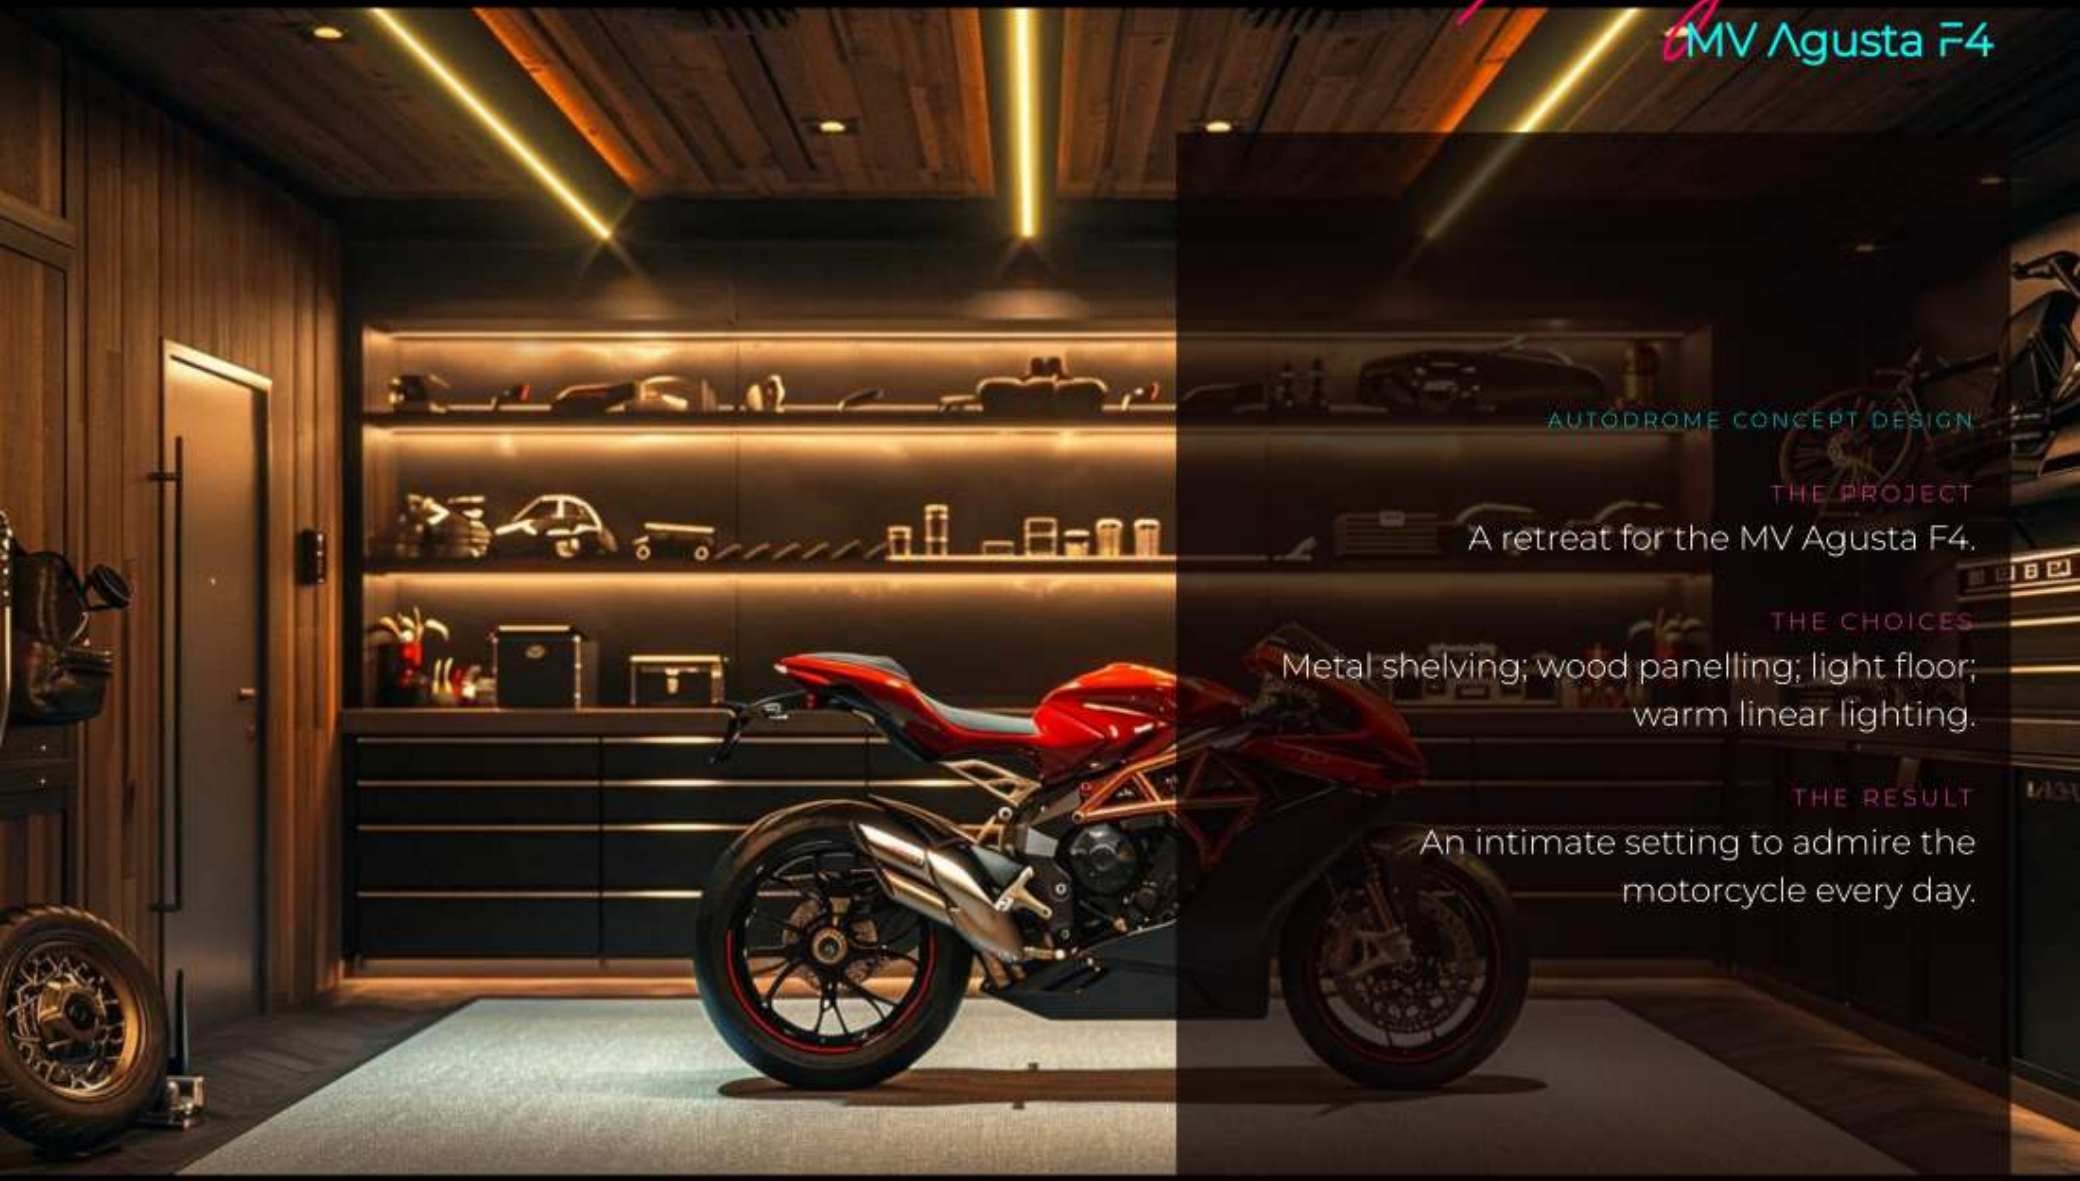

THE RESULT

A motorcycle to live with, not just to store.

AUTODROME

Garage MV

MV Agusta F4

AUTODROME CONCEPT DESIGN

THE PROJECT

A retreat for the MV Agusta F4.

THE CHOICES

Metal shelving; wood panelling; light floor; warm linear lighting.

THE RESULT

An intimate setting to admire the motorcycle every day.

"Every dream begins
with the first step.
We make it real."
